AeroRAG SOP-OPS-737-04: Sterile Cockpit Procedures

Document ID: SOP-OPS-737-04 | Status: APPROVED | Effective: 2024-03-01

1. Definition: Sterile cockpit applies during all critical flight phases below 10,000 ft MSL.
2. Protocol: No non-essential conversation, eating, or extraneous tasks during sterile periods.
3. Deviation Challenge: If violated, observing crew member must announce: STERILE COCKPIT.
4. Response: Active pilot immediately terminates extraneous action: STERILE COCKPIT COPIED.
5. Logging: Any safety-compromising breach must be logged in Captain Voyage Report.
